

Issue #179 Scene Art QA

Scope: scene background contract verification for complete 1024x1024 WebP art, plus rendered QA surfaces for contact-sheet and representative mobile/desktop scene views.

Check	Result
tsc --noEmit	PASS
docLint docs/design.md	PASS
repoLint .	PASS
?selftest=data-audit on :4175	PASS, errors: 0
Scene refs / unique backgrounds	44 refs / 40 unique checked
Scene art review warnings	16 heuristic warnings, non-blocking

Gate Matrix

Source	Capability	Evidence	Status
solCase#2.2	Render scene background without blur/frosted runtime workaround	scene-art renderer unchanged; visual-qa scene-art surfaces render real sceneArt.src	Tested
solCase#7.2	Validate scene background content package assets	data-audit checks load + 1024x1024 + band-detail metrics	Tested
intTest#47	Full scene background asset inventory	contact sheet surface lists 40 unique runtime backgrounds	Tested

Human Review Queue

The heuristic intentionally does not fail the build. It flags low-detail top/bottom bands for human art review so reasonable depth-of-field can be accepted while blur padding remains visible in QA.
