

Test Summary - Issue #163

Conflict resolution with user-provided character assets

- Latest origin/main was merged into PR #171 after a second conflict report.
- README changelog conflict was resolved by preserving both #163 and main #166 entries.
- User-provided local Mary/Yumi raster edits are the authoritative final character bases for this merge.
- Character asset paths remain cache-busted at ?v=20260619-issue163-character-theme-r2.
- No SVG, CSS filter, or renderer special-case substitute was introduced.

Validation Scope

- PASS tsc --noEmit
- PASS docLint docs/design.md
- PASS repoLint .
- PASS In-app Browser data-audit/profile-color/playtimer/accounts/voice
- PASS Mobile character-select visual smoke, no horizontal overflow

Final Character Assets

Mary final

Yumi final

The committed runtime bases are the user-provided raster edits preserved during conflict resolution. Alpha channels remain valid, canvas size is 512 x 768, and the game loads them through the existing character manifest r2 asset version.
